

### WHAT YOUR NERVES NEED

Whatever medication, whatever renewed strength and vigor can be imparted to the nerves must reach them through the blood. Dr. Williams' Pink Pills are a nerve tonic but they act on the nerves through the blood, enabling the blood to carry to the nerves the elements needed to build them up. Neuralgia, sciatica, sick headache and a number of more severe nervous troubles are properly treated by building up the blood with Dr. Williams' Pink Pills and are often entirely corrected in this way.

If you are nervous you can help yourself by refusing to worry, by taking proper rest, sleep and vacations, by avoiding excesses and by taking out-of-door exercise. For medicine take Dr. Williams' Pink Pills, the non-alcoholic tonic.

Sufferers from nervous disorders who have been taking treatment without benefit should investigate the tonic method. Write today to the Dr. Williams Medicine Co., Schenectady, N. Y., for the booklet, "Diseases of the Nervous System." It will be sent free on request.

Your own druggist sells Dr. Williams' Pink Pills or they will be sent by mail on receipt of price, 50 cents per box, six boxes for \$2.50.

### WASHINGTON COUNTY FARM BUREAU ASSOCIATION.

Report for week ending May 20.

|                       |     |
|-----------------------|-----|
| Farmers visited ..... | 17  |
| Letters written ..... | 22  |
| Office calls .....    | 10  |
| Telephone calls ..... | 17  |
| Meetings .....        | 9   |
| Attendance .....      | 78  |
| Miles traveled .....  | 142 |

Most of the farm visits this week have been for the purpose of making arrangements for demonstrations. To date there have been arranged 17 of these, as follows: Six of alfalfa, seven of soy beans, two of potatoes, one of pruning and spraying orchards, and one of the use of lime for clover. There is time to arrange for several more in parts of the county that are not yet represented and it is hoped that the county agent will hear from some of these sections during this week.

The past few wet and cold days have apparently held up a good deal of the planting which would naturally have been completed before this. However, in the case of our corn crops they may be just as well off not to be in a hurry about putting the seed into the ground while it is cold and wet. In case we are putting the soy beans in with the corn at the time of planting it is better to wait until the 25th at least, as the beans are essentially a warm weather crop. When running the planter for both corn and beans it would be well not to run it too deep, as the beans grow best if they are not over two inches in the ground.

The preparation of our seed beds is of vital importance at this time. In case a field was prepared before the rains it is rather necessary that they be given a thorough and deep harrowing before planting, as the rain has packed them so hard. The double action cutaway harrow seems to be proving a very satisfactory tool for most any kind of work, especially in harrowing in manure and lime. Three horses will handle one of these tools very handily and we can get enough more work done with the harrow to make up for the extra horse.

Yours truly,

F. H. Abbott,  
County Agent,  
U. S. Department of Agriculture.

### SUSSEX ASSAILANT IS KNOWN TO U. S.

Lieut. Steinbrink, with U-18, Fired Torpedo—His Punishment Not Revealed.

Washington, May 22.—The German submarine U-18, commanded by Lieut. Otto Steinbrink, fired the torpedo which cost the lives of fifty passengers on the French channel steamer Sussex and brought Germany and the United States perilously near a break in friendly relations.

Officials of the state department admit that this information has been in possession of the department since soon after the Sussex attack.

The information is of value to the state department in checking up on the punishment meted out to the offending submarine commander by Berlin. Up to date no reply has been received from Ambassador Gerard to the inquiry by Secretary Lansing regarding the nature of the punishment suffered by the submarine commander.

Officials are watching the submarine campaign of Great Britain and Russia in the Baltic with interest. Information so far received here indicates that this campaign is being conducted in accordance with the rules of international law.

## \$8,380,185 IN EVASIONS

Of the Income Tax Law Is Added to the Revenue to Be Collected

AGENTS WORKING FOR MONTHS

General Plan at Evasion Was to Pad the Expense Accounts

Washington, D. C., May 22.—Attempted frauds and evasions of the income tax law aggregating \$8,380,185 have been frustrated by the treasury department, it was announced Saturday night, during the first nine months of the current fiscal year. The \$8,380,185 has been added to the incorrect returns assessed against the delinquent corporations and individuals, and will be collected. Whatever additional evasions and omissions may be uncovered in returns yet to be investigated have yet to be examined before the total of the amount withheld can be ascertained.

Agents of the internal revenue bureau, working under the direction of Commissioner Osborne, for months investigated all income tax returns and will continue their work until every one of the returns for the past fiscal year has been checked and verified. The investigation is said to have disclosed that corporations have been greater offenders than individuals. By alleged evasion, omissions and direct attempts to defraud, corporations whose returns have thus far been examined are said to have failed to declare their correct taxes to the extent of \$5,034,026, while individuals failed by \$3,346,159.

Of the alleged corporation delinquencies, \$4,632,213 was discovered by the bureau's investigators and the remaining \$400,813 in auditing the returns. Revenue agents discovered \$3,028,016 of the shortage in individual returns and the remaining \$318,143 was found by auditing.

The general method of making incorrect returns, it is said, has been to pad expense items which are deducted from gross receipts to determine net income. Few corporations or individuals, it is said, understated their gross incomes. Many are said to have added tens of thousands of dollars to their items of expense. Few, it is said, succeeded in covering up the real returns by this method.

In a statement issued by the treasury department Saturday night it was stated that income tax receipts would yield \$110,000,000 during the fiscal year. Approximately \$11,000,000, it is estimated, will be carried over to the next fiscal year for collection, this representing 10 per cent of this year's assessments of \$113,000,000. Should the entire assessment be collected this year, however, the tax would yield \$121,000,000, as \$8,000,000 collected last July—carried over from the preceding fiscal year—is not included in the \$113,000,000 assessment. The estimated income of \$110,000,000 is \$25,000,000 more than was originally estimated.

### SWISS READY TO FIGHT INVADERS

Would Not Tolerate Any Invasion—Army Splendidly Equipped for Resistance.

Paris, May 22.—Switzerland is prepared to resist with all the forces at her command any invasion of her territory by troops of the belligerents, according to an interview with President Camille Decoppet sent to the Journal by its Bernese correspondent.

President Decoppet was asked specifically what would be the action of Switzerland if troops of one of the warring powers should be sent across the Porrentruy salient. He replied:

"The federal council would never tolerate such a proceeding, and, in accordance with the plans of General Ulrich Wille, the commander-in-chief of our army, would order the immediate mobilization of all our forces, which would immediately be sent into action."

"The Swiss army is in splendid condition. It has reached a perfection of training which has been hitherto unknown, and has just received a complete equipment of new heavy artillery which was manufactured in France and Germany by order of the Swiss government."

### NATIONAL RIFLE MATCH INTERESTS

Active Preparations are Being Made and a Large Attendance is Expected Next October.

Washington, D. C., May 22.—In attendance and interest the national rifle match to be held at state camp near Jacksonville, Florida, next October, promises to exceed any of its predecessors. Active preparations, both in Washington and in Florida, are being made for the matches and by the time the range officers commence "commerce firing," everything will be in readiness for the shooting of the famous competition. Capt. William C. Hartlee, U. S. marine corps, has been detailed by the secretary of war as assistant executive officer of the matches and is getting things in shape for his duties in Florida. Adjutant General J. Clifford R. Foster of Florida is also at work on preparations for the contests and is having the range placed in good condition for the visiting riflemen.

The matches will continue through the month of October, beginning with the contests of the Florida State Rifle association, the Southern Rifle association, and the National Rifle association, and closing with the national matches, the latter being government competitions under authority of Congress.

Riflemen the country over, both civilian and service marksmen, are looking forward with interest to the competitions. Last year at state camp, Florida, forty-four teams from the army, marine corps and the National Guard of practically all the states participated, and this year even more teams are expected. The department has provided for the entrance of a team from the coast artillery of the army, which will make three teams for the army branch of the service. E. G. Gortz

will be made to have the government academy at West Point and Annapolis represented by a team. These institutions have not had a team in the matches for a number of years. It is also hoped that the navy, which was not represented last year, will have a team this year.

The national matches were instituted in 1903 by Congress as an incentive to promote skill in individual and team marksmanship among the army, navy and marine corps and citizens and annual or biennial rifle matches have been held ever since. The matches bring together the crack shots of the government military and naval services, the National Guard and government civilian rifle clubs by a system of preliminary trials.

Since the development of civilian rifle practice through the organization of rifle clubs, much interest in the matches now exists among persons in all walks of life all over the country, and information is reaching here from individuals in various states that they plan to attend the matches. Representation is expected from the thousand and twelve rifle clubs now organized and actively at work on rifle ranges all over the country.

Interest in the national matches began in October 20 will be sustained throughout by the action of the national board for promotion of rifle practice in listing the national team match last on the program instead of winding up the tournament with the national pistol match. Heretofore the riflemen began to scatter after the team match was over and there was not much interest in the pistol match. The order of firing has been changed so that the national individual match will be shot first, followed by the national pistol match, closing with the national team match. As this latter competition is the most attractive of the program the riflemen will remain until the finish.

If the border situation continues to require the presence of large bodies of troops, the army may not be represented by its infantry, cavalry and coast artillery teams and it may also prevent the detail of as large a number of troops to operate the range and man the targets as has been the custom. This would afford the National Guard a splendid opportunity to distinguish itself as thoroughly competent to handle the national matches. They desire to have a chance and promise the best match ever held in the United States.

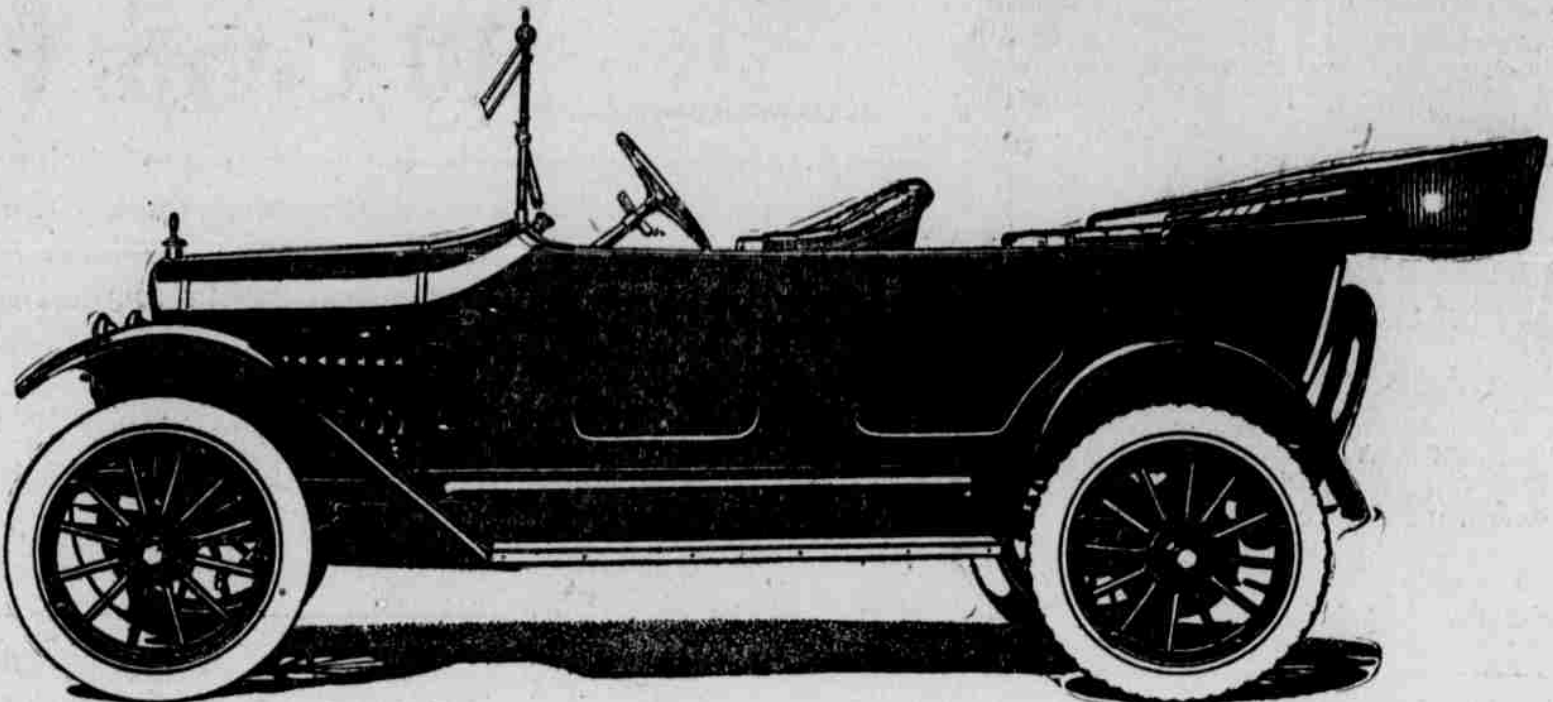

Official. Fred H. Phillips, jr., Assistant recorder national board for promotion of rifle practice. Washington, D. C., May 16, 1916.

### KAISER AT BERLIN.

Returns Suddenly to Settle Ministerial Crisis, Amsterdam Hears.

London, May 22.—Emperor William suddenly returned to Berlin Saturday to settle the ministerial crisis, according to telegrams received in Amsterdam from Berlin, says a Renter dispatch from that city. His arrival was kept quiet, it says, as the emperor wishes to avoid the possibility of a demonstration. The emperor is not stopping at the royal castle, but at Potsdam. He received Imperial Chancellor von Bethmann Hollweg and Dr. Karl Helfferich, secretary of the imperial treasury, on his arrival. It is thought the emperor will not remain long in Berlin, and will leave for the Russian front after the crisis is over.

First Kid—We got a piano at our house.  
Second Kid—Sure we. We got ours on the insolvent plan.—Pickings.

## Why You Should Own a Maxwell

### Comfort

First, because it is a comfortable riding car. Plenty of room for five people; deep, soft cushions; springs made of the best spring steel, scientifically heat-treated, accurately suspended and balanced. You will always be comfortable in a Maxwell.

### Appearance

Second, because the Maxwell is a trim, smart, good-looking car.

Many makers of heavy, high priced cars, as you know, have copied the general lines, the shape of the body and hood of the Maxwell. This is more of a compliment than an infringement.

### Service

Third, because the Maxwell, being a product of thirteen years evolution, is so designed and manufactured that it gives unfailing, consistent and satisfying service to thousands of owners.

Maxwell cars are made of the best materials that money and brains can buy—and they are made right. You can get out of any car only what is put into it.

### Low First-Cost

Fourth, because you get everything in a Maxwell that you can get in any car and you get it for less money.

The answer to this is that the Maxwell is a light car and it is built in enormous quantities. The Maxwell Co. is one of the three largest producers of high grade motor cars in the world.

### Low After-Cost

Fifth, because the Maxwell will give you more miles per dollar than any car built.

We say this without hesitation or doubt. It is our honest belief and we are willing to prove it by Maxwell owners, by comparison with any other car or by any other way you suggest or prefer.

The Maxwell will please you. We know it will. Let us arrange for a demonstration and we'll take the responsibility of satisfying you completely.

### Paint can't be Told by Looks

Paint of the sham variety was never known to produce permanently satisfactory work.

It may pass muster for a while, but looks alone cannot stand up against persistent, ravaging attacks of rain and shine. Looks must be backed up by weather-resistance as it is in paint made from

### Dutch Boy Atlantic White Lead

and pure linseed oil. Protects against decay and gives good looks at minimum cost. Just the thing, too, for inside walls and woodwork.

Our white lead can be had at all first-class paint dealers.
